Modding status of Covet 2021

This is a mod that has been in development since February 2025. The goal is to see how far I can go on my own in creating a highly interactive interior.

As for the progress, it's going at a normal pace—neither particularly smooth nor slow.

The release is scheduled for the second quarter of 2025.

Rework

A rework is planned for the future, but it will probably be quite a while before that happens.

Other Upcoming Mods

The development of a new mod will begin during the creation of the Covet 2021. However, I cannot provide any details about it yet. If everything goes smoothly, this mod is planned for release between the second and third quarters of 2025. Additionally, while working on this mod, another new mod is planned to be created. I will provide more details about it next month.

That's all for now. Thank you for reading.
