

# Flat Top Semi Trailer

RANGE OF SIZES • CUSTOM MANUFACTURING • RANGE OF OPTIONS

The Freighter Flat Top Semi-Trailer may be purchased as a tailored, stand alone trailer or in tag specification to use with an existing lead trailer for maximum payload flexibility.

The Freighter Flat Top Semi-Trailer is available either as a 22 pallet or 24 pallet trailer and features a chequer-plate steel floor. Freighter offers optional aluminium flooring which can further reduce tare weight by around 530kg on a 45ft trailer, optimizing payload capability.

In fact, the integrity of Freighter engineering allows for minimum tare weight and maximum payload with advanced styling and component design giving you the quality appearance and performance you have come to expect from Freighter.

Painted with high quality two-pack-paint applied over grit blasted and primed steel, the Freighter Flat Top Semi-Trailer trailer will retain its excellent appearance with regular maintenance.

Optional components include twist locks in the floor, allowing the carrying of a shipping container.

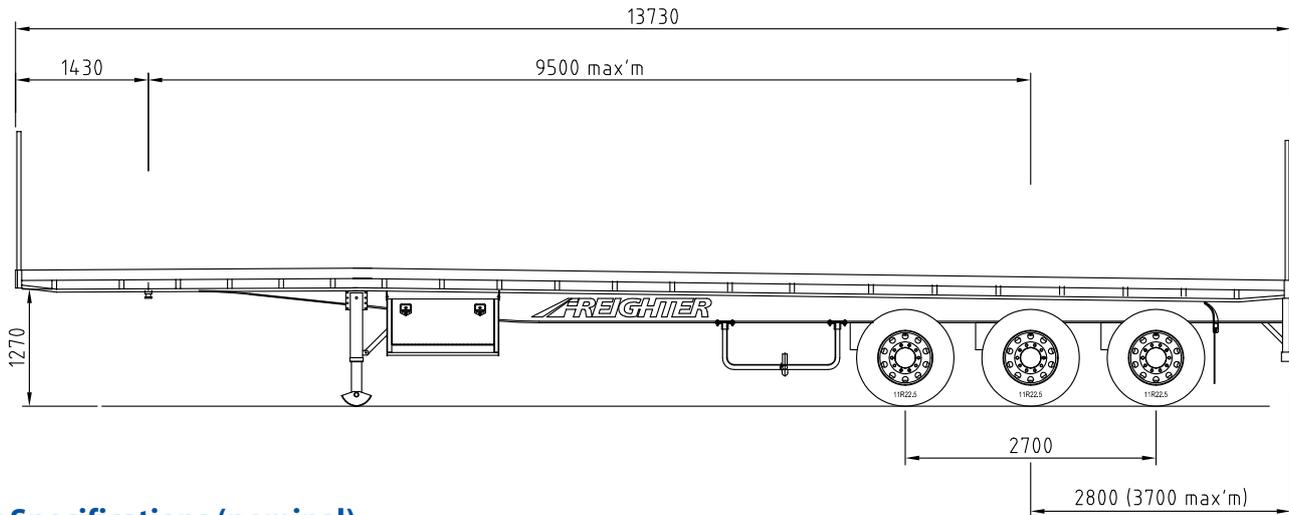

Importantly, your Freighter dealer can ensure that your truck and B-Double combination meets legal dimensional requirements while maximising your payload.

Providing customised, high-quality transport solutions since 1946, only Freighter gives you the full customer service and ongoing support you truly deserve!
